OUR SAFETY FOCUS AND APPROACH

Tutt Bryant Hire strongly believes that work related injuries, property and environmental damages can be preventable. It is in our best interest to ensure our employees' occupational health and safety. We are committed to create and maintain an Incident and Injury Free (IIF) workplace by integrating the Health, Safety and Environment (HSE) Management System approach, focusing on 'Leadership Accountability' and 'Management System Processes'.

The key elements of a successful HSE management system measures:

- Safety plan and inspection checklists - Emergency response plans, evacuation procedures and safety assembly point, project shutdown operations, rescue and medical duties.
- Assign HSE duties to branch managers and/or staff.
- Risk assessments and monitoring - Eliminate potential hazards, outline areas that are not safety compliance.
- Provide adequate ongoing training on rules and safety procedures of the workplace.
- Set measurable targets and reviewed regularly by the HSE management team.
- No hazardous activities will be undertaken prior to completing the risk and safety assessment checklists.
- All operations are fully compliance with legal requirements.
- Provide visitors with thorough information on safety and risk preventative measures, as well as emergency procedures.
- All incidents are to be reported to the HSE management team.
- All incidents are to be identified and investigated thoroughly by the HSE management team to prevent any future recurrence.
- Provide Injury Management and Rehabilitation Program to staff as required.

Health and safety is of utmost importance; Tutt Bryant Hire is committed to create an incident and injury free workplace.
